Additional information needed

1. The size of all other existing signs on the property should be noted. Properties within the HPA are only permitted up to 25 square feet for all signage.

   There is only one sign on the property. It is the Sylvan Learning sign that I am replacing with the new logo. Its square footage is 7.78.

2. The area of the main door window should be noted. Window signs shall not exceed one-fourth of the total area of the window.

   The area of the main door window is 21 square feet. The lettering comprising the sign covers 2.3 square feet.

3. A note should be added to plans stating that lighting for the ground sign will not flash, blink, fluctuate, move or in any way fail to provide a constant illumination.

   The current lighting for the ground sign is on a timer and provides a constant illumination for a specified amount of time every night. There are no changes to be made for this fixture. It has been in operation for 16 years.
