

Tree of Life Chiropractic Sign Proposal

Please find the rendering of our sign proposal attached.

FastSigns is our sign contractor and is going to be designing and creating our new sign panels.

In order to bring our non-conforming sign into conformance with the City of Grove City's HPA code we will be tearing down the existing sign structure that is 4x8 in size and replacing it with a sign structure that is 4x6 (25sqft) in size.

Materials to be used to construct new sign foundation:

2 Cedar posts
4x6 Routed slot for the sign panel (made from ply-board)
2 decorative toppers
Natural wood stain for the sign foundation

Sign panels:

Will have a black background with the Tree of Life Chiropractic office Logo in the copy on the sign will read: Tree of Life Chiropractic. Please see sign rendering for sign material being used.

Sign Lighting:

We will be using a combination of solar lights and small ground spotlights to light up the sign from the bottom.

Landscaping:

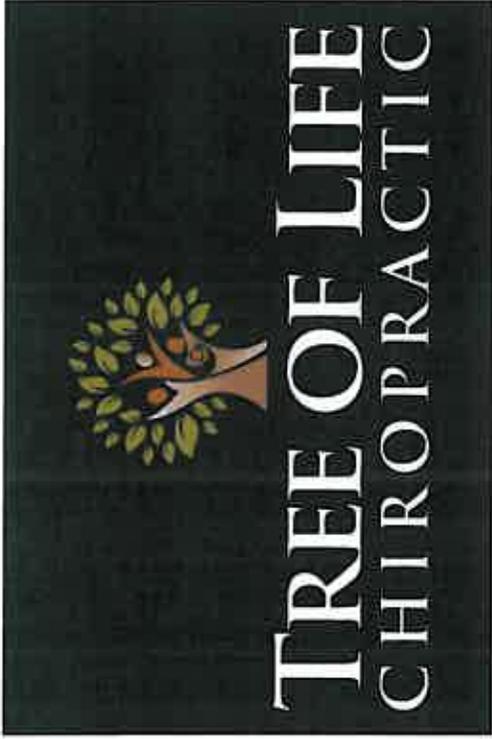

We have no plans on changing the existing landscaping around the sign...other than to plant flowers in the spring.

Thank you for your review of our sign proposal.
