

SWIMMING POOL/SPA CHECKLIST

1. A pre-construction meeting must be scheduled between the builder (or contact person) and representatives of the Grove City Building Division to go over the following items:
 - A pre-inspection of curb and sidewalk conditions prior to pool construction is required to note existing conditions.
 - A pre-inspection of the pool site is required prior to installation to locate benchmarks and verify existing elevations.
2. An electric permit is required. (Installation must comply with Article 680 of the National Electrical Code.)
3. The following items must be submitted for review with any application for a swimming pool or spa:
 - ___ A site plan that includes the following
 - ___ Location of the pool, including distance from all property lines and structures on the property
 - ___ Easements
 - ___ Dimensions of the pool
 - ___ Elevation of existing grades at one-foot intervals
 - ___ Proposed elevation of the pool, deck and grade surrounding the pool (at 1-foot intervals)
 - ___ All decking around the pool
 - ___ Location of pool-related equipment
 - ___ Location of all utilities (electric, telephone, cable, etc.)
 - ___ Indication of whether utility lines are underground or overhead
 - ___ A landscape plan
 - ___ Details of the barrier around the pool (fence permit required)
 - ___ Type of barrier
 - ___ Height of barrier
 - ___ Dimensions of any slats
 - ___ Details on alarm on rear door of the house if required
 - ___ Structural drawings of the pool
 - ___ Details of entrapment protection
 - ___ Details of where pool filter drain lines are discharged
 - ___ Details of sewer/storm drainage locations
 - ___ Details of materials used in the pool construction, including liners and pool covers (plastic, gunite, etc.)
